

PID 1dof (mask) (link)

This block implements continuous- and discrete-time PID control algorithms and includes advanced features such as anti-windup, external reset, and signal tracking. You can tune the PID gains automatically using the 'Tune...' button (requires Simulink Control Design).

Controller:

Form:

Time domain:

- ☒ Continuous-time
- ☐ Discrete-time

Discrete-time settings

Sample time (-1 for inherited):

▼ Compensator formula

$$I \frac{1}{s}$$
